

Our socket gives SharXS a new bite.

OSRAM SFC10-4
pre-focus socket

You know the powerful OSRAM SharXS® HTI® lamp. Now meet its mate. The OSRAM SFC10-4 pre-focus socket takes performance to new depths. Versatile and easy to use, the socket can be wired from the left or right side, and works with SharXS HTI lamps. A special key-lock feature pre-focuses the lamp for accurate insertion every time.

All that glitters is not gold. Only the OSRAM SFC10-4 socket adds teeth to the SharXS bite.

OSRAM SFc10-4 Pre-Focus Socket

For SharXS HTI Double-Ended Lamps

Get more life with your OSRAM socket solution

Wire From Either Side

Superior Contact Design

One-piece Ceramic Insulator

Informational Bites

Superior contact design

A **solid nickel contact** provides excellent corrosion resistance and durability. It can't wear off!

A **unique contact and spring configuration** optimizes the electrical and mechanical properties of the socket. No wonder it lasts longer!

The **advanced contact geometry** ensures optimum lamp and socket connection, minimizing resistance and extra heat.

Try it and you're hooked!

Versatile wiring options and a key-lock feature make the OSRAM SFc10-4 socket **easy to use**.

The unique and robust design ensures **long life** with multiple re-lampings.

This **high performance** socket is a key part of the OSRAM SharXS system solution.
